

# Prestashop 1.6 module installation manual

You will need API keys for your module to connect to Swipe. API keys are available in [Swipe's administration panel](#) - you will need to [register a free account](#) to get keys you can test your integration with. After that you can proceed with the rest of this manual.

To start accepting real-money payments, you will need to [apply for a verified account](#). Once your account is verified, you can simply replace testing keys with live keys and you're all set for accepting live purchases.

1. Insert the contents of module archive (see Image 1) into Prestashop server folder under "modules" (Prestashop root folder > htdocs > modules).

Image 1: Module archive content

2. In Prestashop administration panel open the section "Modules and Services" (see Image 2).

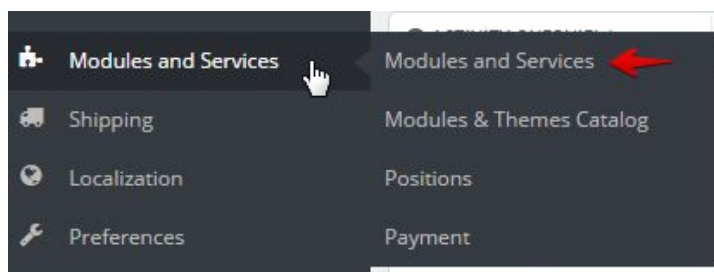

Image 2: Prestashop Modules and Services section

3. Choose to filter modules by "Modules Not Installed" (see Image 3).

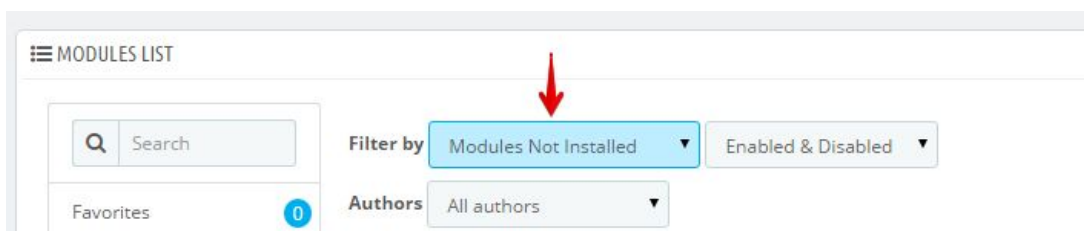

Image 3: Module filter settings

4. Find Swipe module and install it (see Image 4).

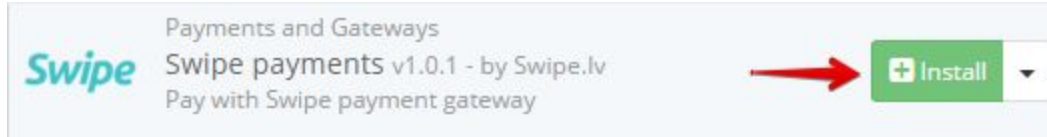

Image 4: Module installation button

5. Confirm module installation by pressing the “Proceed with the installation” button (see Image 5).

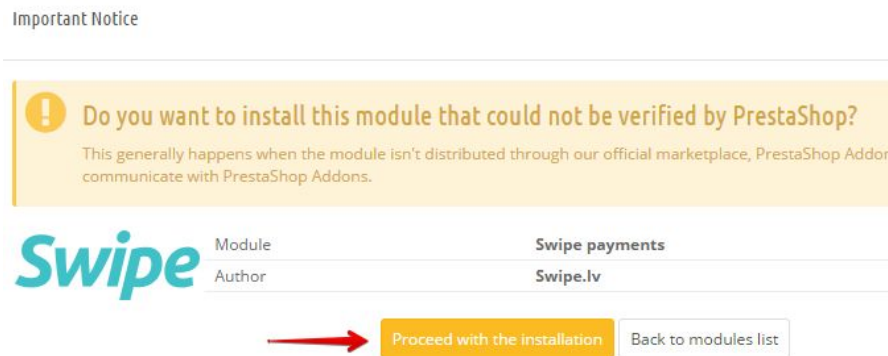

Image 5: Module installation confirmation view

6. After the installation, module settings will open. Module provides several parameters (see Image 6) that should be filled out for it to work correctly:
  - a. **Public key** - available in [swipegateway.com company administration panel](https://swipegateway.com/company-administration-panel), “API” section (see Image 7).
  - b. **Private key** - available in [swipegateway.com company administration panel](https://swipegateway.com/company-administration-panel), “API” section (see Image 7).

# Configure

Swipe payments

Module(s) installed successfully.

## Swipe payments

This module allows you to accept Visa / Mastercard payments by Swipe.lv

**Contact details**

Please specify the Swipe account details for customers.

Public key

Private key

The screenshot shows the 'API' configuration page in the Swipe system. At the top, there are navigation tabs: 'Maksājumi', 'Klienti', and 'Produkti'. On the right, there is a user profile 'Demo kompānija' with a dropdown menu. The dropdown menu is open, showing options: 'Uzstādījumi', 'API', and 'Iziet'. A red arrow labeled '1' points to the 'API' option. Below the navigation, there is a 'Uzstādījumi' button with a red arrow labeled '2' pointing to it. The main content area has three sections: 'Pierakstīšanās informācija' with a dropdown menu set to 'Test'; 'Tirgotāja atslēgas' with a dropdown menu set to 'Test' and a label 'Ieraksta nosaukums'; and 'Privātā atslēga' with a text input field containing '1' and a label 'Publiskā atslēga'. Red arrows labeled '3' and '4' point to the input fields for 'Ieraksta nosaukums' and 'Publiskā atslēga' respectively.
